ADDITIONAL SKILLS & INTERESTS

Languages: French (intermediate), English (native)
Fine Arts: Piano, Guitar, Music Production & Engineering
Interests: Music Technology, Web Design, Graphic Design, Film, Music

Clifton Strengths Reflection

One of my strengths in my Clifton Strengths results was “Harmony,” meaning I look for areas of agreement and aim to settle argumentative matters. I show my strength of harmony through my experience in my high school music club, using phrases like “collaborated with other branches” and “coordinated rehearsals.” That shows I was able to effectively lead a group of people and settle differences to produce successful performances amongst ourselves and with other parts of the club. I also demonstrate harmony through my time in the Technology Student Association as I say that I “settled conflicting plans” for the website we created, illustrating that I was able to take others’ opinions into account to produce a compromise that was successful.
